#### INTRODUCTION TO INFLATE & GO

Your new Inflate & Go high jump landing system is an easily portable high jump landing system designed specifically to help your athletes perform. The pit can be set up in as little as five minutes. The Inflate & Go pit is designed to be set up and taken down by one person. This is not only a safer process than the traditional foam pits, but it reduces the liability issues by storing the inflatable pit in a lockable storage box. The storage box also eliminates the possibility of vandalism and damage due to weather exposure.

With proper care of your Inflate & Go landing system, you will enjoy years of use and you and your athletes will be able to **PRACTICE, COMPETE AND ACHIEVE** your high jump goals.
